

HOW TO USE CHRISAL'S PIP PROBIOTIC WATER PLUS & TINGLE MOUTH RINSE

WELCOME TO THE WORLD OF CHRISAL PIP – Probiotics-In-Progress..!

- **Dilution Instructions:** FIRST, ALWAYS SHAKE THE CONCENTRATE REALLY WELL BEFORE DILUTING..! **NOTE – PIP WATER PLUS IS SO ECONOMICAL & POWERFUL THAT IN DRINKING WATER FOR FARMS IT CAN BE DILUTED BY A FULL 10,000 TO 1...!** You only need one part PIP WATER PLUS 9,999 parts water...! So as a dietary supplement, you only need to put in one or two drops into a glass of water.

For use as a refreshing mouth rinse and for a rinse for after brushing your teeth, you can use a much stronger solution. You can make it as strong as you like, but normally just giving a little squirt into a small bathroom glass and add warm or cool water is enough. After brushing your teeth, pour some of the mixed Water Plus onto your toothbrush to protect it and then use the rest to rinse out your mouth with. If when you swish the mix in your mouth, it becomes more foamy than you like, just use less the next time. Using a little too much is not a problem, but it really is a waste of the product.

Though it is not harmful, the product is way too strong to use without diluting..! It is also a great waste of a very economical to use product. Also, remember to ALWAYS SHAKE BEFORE DILUTING..!

For a mouth rinse and in a glass to keep your toothbrush fresh, you can dilute anywhere down to 30 or 100 to one, but it still works very well at 500 to one or more. Then, once Diluted, make sure you only use whatever you mixed for not more than five days to a week, then pour down the drain to keep your sinks drains and pipes fresh.

CHRISAL PIP PRODUTS ARE INCREDIBLY POWERFUL... AND LESS IS MORE..! So, Save Your Products & Your Money. Note: Using twice as much does not make it better - Chrisal is perfect as it is and will provide both a great cleaning experience & increased protection.

- **NOTE:** The concentrate has a shelf life of up to two years. Please keep at room temperature and out of direct sunlight, do not exceed 122°F or freeze. Always shake before mixing.
- **REMEMBER, ONE LITER OF CHRISAL ECONOMICAL PIP WATER PLUS NORMALLY MAKES FROM 1,000 TO 10,000 LITERS OF BETTER WATER – or 30 to 100 liters of Mouth Rinse!**
